Subject: secure parking for TAGA available at EPA Houston Lab
Date: Monday, March 18, 2019 7:28:08 AM

Marc and Dave – I spoke with Wes McQuiddy at the Houston Lab this morning about having the TAGA parked overnight at the lab during the ITC incident. Wes is preparing a spot for the TAGA and has confirmed shore power is available. Wes said there are numerous hotels near the lab.

If you need to talk with Wes, you can reach him on his EPA cell at 469-563-8002. Thanks for your assistance.
